

MAINTENANCE

Because the mirror surface is non-static, the frequency of cleaning is minimized. **MIRRORLITE® Mirrors** can be cleaned with a non-abrasive liquid household cleaner like Windex or Johnson's "Klean n' Shine." A soft lint-free cotton cloth like a micro-fiber cloth should be used to apply the cleaner. Should the surface become lightly scratched, it can be restored by applying a pure carnauba wax like Pledge, and polishing with a soft cloth. Lightly buff until clear. Do not use a compound wax- it contains abrasive.
